

Ear Corn

A photograph of a cornfield at maturity. The corn plants are tall, with many ears visible. The leaves are mostly brown and dry, indicating the crop is ready for harvest. The background shows a clear sky and some distant trees.

Seeding rate: 29,900 seeds/acre

Cover Crop Program:
No-till planted cereal rye on Oct 22nd, one day after
harvest, approximately 2.5 bu/acre

Cost approx. \$28/A

Corn Silage

Seeding rate: 29,900 seeds/acre
